

ABSTRACT

The present invention relates to a corrugated product (10), comprising at least one first substantially plane sheet (11) and at least one second
5 sheet (12) arranged in wave shape, wherein the first sheet is joined with the second sheet in joining areas (15), forming a framework shape having the joining areas arranged at tops (14) of the second sheet, wherein at least the first substantially plane sheet (11) is arranged with a regular elevation (16) between adjacent joining areas (15).
